

Feline immunization requirements as per our Community Practice Service:

1. FVCRP (Panleukopenia Virus/Feline Herpesvirus-1/Feline Calicivirus)

- Initial vaccination <16 weeks: Begin as early as 6 weeks of age, then every 3-4 weeks until 16 weeks of age.
- Initial vaccination >16 (>4 mos): Administer 2 doses, 3 to 4 weeks apart
- Booster: A single dose is given 1 year following the last dose of the initial series, then no more frequently than every 3 years.

2. Rabies

- Initial vaccination <16 weeks: Single dose as early as 8 or 12 weeks of age
- Initial vaccination >16 (>4 mos): Administer 1 dose, revaccinate 1 year later
- Booster: A single dose is given 1 year following the last dose of the initial series, then no more frequently than every 3 years.

3. Feline Leukemia Virus (FeLV) *requires negative FeLV test first

- Initial vaccination <16 weeks: Initial dose due 8 – 12 weeks of age; a second dose should be administered 3-4 weeks later.
- Initial vaccination >16 (>4 mos): Administer 2 doses, 3 to 4 weeks apart
- Booster: A single dose is given 1 year following the last dose of the initial series, then annually
